

Benefits

Streamlined benefits administration for you and your employees

Our Benefits solution enables you to better manage all the challenges associated with benefits administration by providing a streamlined benefits administration solution that is designed for you and your people. You'll be able to easily plan, set up, and administer your benefit offerings in one place while ensuring that enrollment and benefits data is securely and automatically delivered to carriers for open enrollments as well as life events. And you'll be able to provide an engaging, mobile-friendly enrollment experience, enabling employees to manage their own elections from anywhere and make the best selection for their families.

Streamlined Administration

Take full control of your plan setup including eligibility, deduction amounts, enrollment dates, and more to bring your benefits strategy to life. Then allow the Benefits solution to streamline the administration process by auto assigning plan profiles to employees upon hire, automating notifications and workflows, and providing you real-time visibility into critical data all in one place.

Seamless, Secure Connectivity

Automatically and securely deliver benefits data directly to carriers of all benefit types including health, voluntary, financial, and more. Plus, with Smart Forms™ you don't have to worry about carriers not accepting EDI files; the system will auto-populate the appropriate digitized form and send it to carriers, eliminating manual key-in enrollments on carrier sites.

Engaging Employee Experience

Our Benefits solution helps you make enrollment easy by empowering employees to manage their own benefit elections from anywhere on their preferred device, easily compare plans, and understand contribution amounts allowing them to make the best selection for themselves and their families.
